

# Karthik Bhattaram

San Jose, CA, [karthik.bhattaram.1@gmail.com](mailto:karthik.bhattaram.1@gmail.com), (415)-605-9721, [LinkedIn profile](#)

## Technical Skills

Programming Languages: C/C++, CUDA, Python, Java, Shell, Verilog, JavaScript, HTML, CSS  
Technologies/Frameworks: Scapy, Numpy, OSI Model, TCP/IP, Linux, Bash  
Developer Tools: Vim, Emacs, Visual Studio Code, GitHub

## Internships

### Software Engineer, Summer 2024: [OpenEye Scientific](#)

Technologies Used: Scapy, YAML, Python3

- Performed data science based analysis on molecule collections using Python
- Designed AWS workflows for computational science
- Applied feature and performance improvements to drug discovery software written in CUDA C++

### Hardware Architecture, Summer 2023: [Cadence Design Systems](#)

Technologies Used: System Verilog, Python3, Xcelium

- Developed an automation tool for making memory wrappers based on foundry-provided memories
- Wrote test benches for verification of the wrappers

### Hardware Verification, Summer 2022: [Axiado Corporation](#)

Technologies used: Scapy, YAML, Python3

- Applied and improved upon the testing infrastructure created the previous Summer.
- Discovered multiple bugs in the company's network security system-on-chip by designing various packet flows based on network and network security protocols.

### Software Development, Summer 2021: [Axiado Corporation](#)

Technologies Used: Scapy, YAML, Python3

- Developed testing infrastructure for the company's network security system-on-chip.
- Created network packets based on TCP, IP, ICMP, IPSec, MACsec, TLS, etc.
- Published findings in the form of a research paper.

## Honors

- UCSB Regents Scholar
  - Merit scholarship awarded to the top 2% of students
- UCSB Engineering Honors
  - Program to enrich the educational opportunities for outstanding students within the college
- IBM Certificate: Python for Data Science and AI

## Education

University of California, Santa Barbara/ Computer Science B.S. and minor in Statistics and Data Science

Santa Barbara, CA / Expected Graduation: June 2026

Relevant Coursework:

- Data Structures and Algorithms, Computational Science, Algorithms Engineering, Finite Automata, Computer Communication Networks, Deep Learning, Artificial Intelligence, Advanced Applications Development
- Linear Algebra, Differential Equations, Probability and Statistics

**De Anza College, Cupertino/ Certified Enterprise Security Professional, Certificate**  
Cupertino, CA

**Relevant Coursework:**

- **Object Oriented Programming in Java, Data Communication and Networking, Personal Computer Security, Network Security, TCP/IP Protocol Suite, Ethical Hacking, Advanced UNIX/Linux, x86 Assembly, C++ Programming**
- **Discrete Math, Vector Calculus, Multivariable Calculus**
